Your poster is on the next page. Read these instructions before printing.

How to display your COVID Alert poster

Print in black and white or colour. Or display on a computer monitor, tablet or TV. Show the whole poster including header and footer.

Visitors can find and scan if you put posters:

- **At each entrance and inside.**

- **About 130 cm (4 feet 3 inches) from the ground.**

- **On flat surfaces that do not move.**

Add or move posters to meet your visitors' needs.

For best results

Put posters where there's light but not glare. Find places where people can get close with their phones while distancing.

COVID Alert posters are designed for standard letter size paper. But you can also use other paper sizes.
